

## Panasonic reliability – now in small packages...

The Panasonic 7900 Workstation proves that good things really do come in small packages. Purpose-built design with the proven reliability you've come to expect from Panasonic, the 7900 is the next big thing in point of sale systems (POS).

## Compact

- The compact, "all-in-one" design of the 7900 eliminates the clutter of additional hardware giving you a clean look that also saves space.
- Make the most of your front counter real estate with the 7900's standard rear-facing point-of-purchase display. Or, for a more engaging look, take advantage of the optional rear-facing full color 12" LCD display. Promoting special menu items is now easier than ever!
- Make the most of your front counter space with our integrated credit card swipe. Positioned directly below the LCD display, the card swipe is easily accessible yet does not interfere with customer transactions that take place on either side of the LCD display.

15" Display Option, Landscape

## Innovative

- The adjustable, dual back light LCD display comes standard as 12" but is also available in 15" and provides high resolution, high contrast images for faster, more accurate order taking.
- Make the most of your LCD real estate by customizing your 7900 based on your unique operations. Orientate the optional 15" display either portrait style to create a valuable packing screen or the traditional landscape style to provide more room for important ordering commands.
- Increase order accuracy and speed of service with the optional rear facing 12" LCD display that can be used as an order confirmation device as well as a place to promote special messages at the point-of-purchase.
- No moving parts gives the 7900 much higher reliability than other workstations or PCs that have hard disk drives (HDD) and fans.
- Internal uninterrupted power supply (UPS) ensures smooth system shutdown and recovery in the event of a sudden power loss.
- Modular design features field replaceable compact flash card, and an easily accessible UPS battery for fast, easy maintenance if needed.

## Durable

- Keep your restaurant looking clean and new with the Panasonic 7900. The durable plastic casing resists dust, dirt and grease build-up, giving your front counter a friendly and clean face.
- Accidents happen but they won't stop the Panasonic 7900. With a spill resistant design, the 7900 can withstand even the wettest mistakes.
- Free of moving parts, the 7900 Workstation is XP embedded with no hard drive, making it an outstanding choice for supreme reliability and durability.

## Versatile

- Optional standalone workstation software with polling capability offers a low cost method to send restaurant data to external recipients without sacrificing the ability to run valuable key management reports including Time & Attendance and Cash Control.
- For a more robust reporting solution, Panasonic's proven back-office solution – System Manager Pro (SMP) – offers complete reporting including inventory control.
- Configure your 7900 Workstation with Panasonic's Corporate System Manager Pro (CSMP) as part of your overall enterprise-wide system solution – you can even communicate with stores using different Panasonic workstation models.
- A flexible restaurant solution, the 7900 can run third party software with the included XPe CF Card or with an optional hard drive.
- Increase your speed of service by combining your 7900 solution with a handheld order taker for line busting and remote order taking applications.
- From quick service to table service, the 7900 can adapt to almost any restaurant operation.

15" Display Option, Portrait

Optional Rear Display

## Supportable

- A field replaceable Compact Flash (CF) card allows you to easily maintain your workstation and save money on costly service visits.
- Save the time and headache of a lengthy workstation set up. With the help of your back-office PC, configuring the 7900 is as easy as inserting a blank CF card and answering a few simple questions.
- Rest easy, your valuable store data is dually maintained in your 7900 and back-office PC, allowing easy data restoration when necessary.
